

Transmitter-Receiver Optic Head Type Fv

with driver stage (v) for external control unit

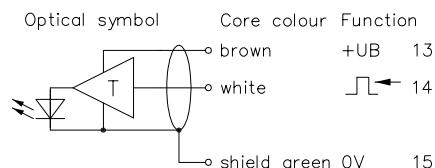

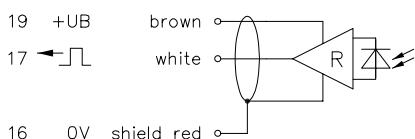

Scale 1: 2.5

0 – 5m
(0 – 10m)

Transmitter-Receiver
Optic Heads
with
driver stage

Fv

Connection of optical elements:

Order No.:

3181

Technical Characteristics:

Housing	PVC
Weight	approx. 2x140g incl. 4m cable each
Protection mode	IP65
Connection	2-core cable (4m), shielded
Receiver element	Si phototransistor
Transmitting light	GaAs 880nm, invisible
Photov. elem. dia. T/R	Ø=5/5mm
Angle of beam spread T/R	approx. 20/15°
Ambient temperature	-25...+60°C
Range	in clear air without diaphragms: 5m with PP2..00-2 10m with PP2..10-2

Features:

Photov. elem. dia. T/R Ø= 1/1mm, pw
Angle of beam spread pw approx. 40°
Cable with increased resistance to oil, ö
Cable lengths up to 40m on request
Cable plug on request

Accessories:

- Control units PP2..00-2 or PP2..10-2
- Diaphragms
- Optical filters

1 tb
3181 DE
15.08.02

Caution: Permissible optical cable lengths max. 40m without any loss of power! If possible, do not lay the transmitter and receiver cables parallel to each other! Close staggering of more than one light beam is only permissible when using multiplex systems.
